EDUCATION

University of Illinois Urbana-Champaign , <i>Masters Degree</i>	08/2023 - 12/2024
Major: Autonomy and Robotics	CGPA: 3.77/4
NMIMS' MPSTME , <i>Bachelors Degree</i>	07/2017 - 06/2023
Major: Computer Engineering	CGPA: 3.67/4

WORK EXPERIENCE

Intelligent Motion Laboratory , <i>Research Developer</i>	08/2023 - 12/2023
<ul style="list-style-type: none">Implemented advanced facial detection and analysis techniques using FaceMesh, OpenFace 1.0, and DeepFace for a robotic eye exam, alongside head pose estimation with ZED camera's depth tracking, to enhance the accuracy and effectiveness of facial feature detection in various scenarios.Engineered and simulated a robotic arm, focusing on optimizing camera placement for effective 3D mapping, thereby improving the precision of face detection and head pose estimation for comprehensive eye examinations.Technologies Used: Python, Robot Operating System (ROS), CAD.	
All India Institute of Medical Sciences (AIIMS) Hospital , <i>Research Intern</i>	02/2021 - 05/2023
<ul style="list-style-type: none">Working closely with a diverse team, developed and executed an innovative research project financed by the Indian Council of Medical Research (ICMR). This project led to noteworthy achievements, such as a 10% decrease in surgery times and a 20% enhancement in accuracy.Played a key in the design and assembly of a custom 2-directional catheter and mouthpiece integrated with a camera system, contributing to successful intubation.Technologies Used: Python, 'xArm 5' robotic arm, Machine Learning, Robot Operating System (ROS), CAD.	

PROJECTS

Intelligent Ground Vehicle Competition (IGVC) , (<i>ROS, OpenCV, PID Control, Path Planning, CAD</i>)
<ul style="list-style-type: none">Led a multidisciplinary team as Co-Captain for this international robotics competition held in Detroit, USA. As captain of Team D.A.R.V.I.N, we achieved impressive 2nd and 3rd place rankings in the highly competitive Cyber and Auto-Nav Challenge categories, demonstrating our excellence in autonomous vehicle navigation in challenging environments.
Autonomous Driving Car (<i>Python, Path Planning, Vehicle Control, CARLA Simulator</i>)
<ul style="list-style-type: none">Implemented Hybrid A*, Spline Interpolation, and Dynamic Programming for path planning search for waypoint navigation for racetracks in the CARLA simulator.Integrated a Proportional-Derivative (PD) controller for real-time autonomy with obstacle avoidance and steering angle adjustments, speed, and braking, enhancing the car's efficient navigation through racetracks.
Disease Detection System using Machine Learning (<i>Python, Pytorch, CNN</i>)
<ul style="list-style-type: none">Achieved an accuracy rate of over 90% in predicting chronic diseases, including COVID-19, Pneumonia, Heart Disease, Chronic Kidney Disease, Diabetes, and various skin diseases. This system holds the potential to revolutionize early disease diagnosis.
Soft Robotics Hand (<i>Arduino, 3D Modelling and Printing</i>)
<ul style="list-style-type: none">Created a Soft Robotic Hand controlled by five individual stepper motors, enhancing dexterity and flexibility, with Arduino for control and 3D modeling and printing for construction.
Custom Surveillance Drone (<i>Arduino, 3D Modelling and Printing, ESC Controller, Pix hawk</i>)
<ul style="list-style-type: none">Engineered a custom surveillance drone featuring a modular 3D-printed body and high-performance 1200KV BLDC motors, controlled via a Pix hawk Flight Controller and an ESC for motor control.

SKILLS

Programming:	Python, C++, Robot Operating System(ROS), OpenCV, PyTorch, PID Controllers, Motion Planning algorithms, Machine Learning(ML), Convolutional neural network (CNN)
Tools:	Autodesk Fusion 360, Computer Aided Design (CAD), Linux, Git, Arduino, Raspberry Pi
